

WHOS IN MY HOME?

A guide to who may be involved during a water loss at your home

WATER DAMAGE COMPANY

The quarterback of your job. We will remove water and affected materials in your home.

PLUMBER

Sometimes they are the first on site and can turn off the water as well as make plumbing repairs

TESTING COMPANY

This company will come out and take tiny samples of drywall and other materials to make sure no Asbestos or Lead is present before demo.

ABATEMENT COMPANY

If the results from testing are positive another certified company will have to come in to remove hazardous materials

INSURANCE ADJUSTER

This is the representative of your insurance company. They will provide approvals and payments for work completed

RECONSTRUCTION

This company will put your home back together. They will need to obtain approvals from your Adjuster before starting work.
